Texas Resilient Streets & Greenway Asset Mapping Community Engagement Synthesis

Dr. Billy Fields Department of Political Science

- Texas cities challenged by flooding, drought, & intense summer heat.
- Texas Resilient Streets & Greenways Asset Mapping project examines key green & blue infrastructure examples within the Texas Triangle
- Emerging examples show how our streets, parks, & green spaces can serve the multiple goals:
  - improved water management
  - enhanced community accessibility & health
  - greater livability & economic vitality
- Healthy Streets, Resilient Communities Working Group established to apply lessons in San Marcos
