

# Depositing Research Data in the TXST Dataverse

<http://dataverse.tdl.org>

<http://data.tdl.org>

<https://dataverse.tdl.org/dataverse/txstate>

## What do you get when you deposit?

- Persistent identifiers (DOIs)
- Control over who can access your data
- Regular backups with replication
- Fixity checking of backups (including preservation storage)
- Capture of important preservation metadata (file format, size, rights information, and version tracking)

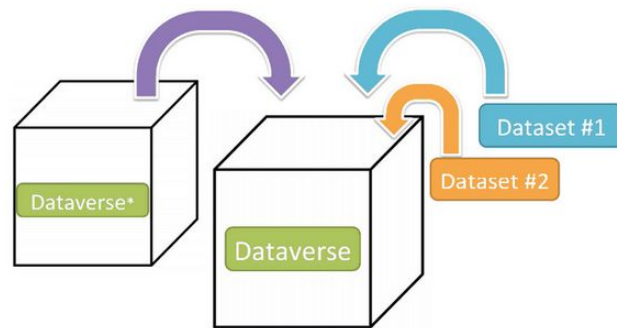

## What can you do in TXST Dataverse?

- Deposit data from any discipline
- Deposit any file type that is <4GB
- Deposit any dataset that is <10GB
- *Cannot* deposit data that contains confidential or sensitive information
- Edit the license that governs re-use of the data. (CC0 is the default)

## Dataverses

- Contains dataverses and datasets
- Centralized Projects / Teams

Container for your **Datasets** and/or **Dataverses\***

\* Dataverses can now contain other Dataverses (this replaces Collections & Subnetworks)

## Datasets

- Contains files
- Has a persistent DOI (datasets and files)
